"ENDLESS LIVING TREASURES"

\$7.50

Most of us have never seen what lives in a sea grass meadow or on a limestone outcrop - tiny green shrimp and scarlet sponges, the crystal and glittering comb jellyfish. Come explore with Cypress Rudloe, the sea water tanks and aquariums at the Gulf Specimen Marine Laboratory in Panama, FL (<http://www.gulfspecimen.org>). Cypress will tell you about many of our lesser known sea creatures and show you the touch tanks where you can actually pick up and handle live sea anemones, urchins, starfish, sea pansies, sand dollars and clams. A delightful, educational tour that shouldn't be missed. \$7.50 ADULTS \$5.00 CHILDREN Pay at the entrance.
